Move: 9 (due to age)
Force Sensitive: N
Force Points: 1
Dark Side Points: 0
Character Points: 3

Equipment:

Comlink, Datapads, Antiseptic Coveralls, Code Cylinders

Description: Rasett Milio was a human male scientist who served in the Galactic Empire's Tarkin Initiative as the administrator of its HECIL division. Milio's projects focused on the creation of containment channels and force fields in order to "sheath" energy unleashed by a superlaser into a focusing cone.

Personality and traits
Rasett Milio had hair that had turned gray, brown eyes, and light skin.

Equipment
While part of the Kyber crystal research team, Milio wore a blue-and-white engineering jumpsuit. The jumpsuit had antiseptic coveralls, which were marked with the insignia of both the Empire and the Tarkin Initiative. His uniform had a tunic that would change colors when in the presence of dangerous radiation, and shoes grounded against potential static charges within the labs. His jumpsuit included a pocket over the chest that held code cylinders, which unlocked access to restricted laboratories.
