# Weapons D6 / Gravity Hammer

Name: Gravity Hammer
Type: Tool
Material(s): Beskar
Scale: Character
Skill: Melee Combat: Gravity Hammer
Cost: 5,000 credits
Availability: 2, X
Difficulty: Moderate
Damage: Str+1D (physical)

Game Notes: The Gravity although only doing moderate damage when used normally in combat, has the ability to increase it's mass to hit much harder, allowing the user to add 2D to any attack it is used in as the Hammer becomes much heavier during the strike. Also due to it's construction from Beskar, the Hammer can be used to parry Lightsaber blades.

Description: A gravity hammer was a type of hammer used by the Armorer to forge Mandalorian armor. Around 9 ABY, the Armorer used it within her workshop inside the Mandalorian covert on the Outer Rim planet Nevarro to forge Din Djarin's armor. Later, she used it within the covert on Glavis Ringworld to reforge a beskar spear to Grogu's armor. She also used it to spar with Din Djarin, while she trained him to use the Darksaber, as the tool was able to repel strikes from the lightsaber.
