

## Starships D6 / Corellian Engineering C

### VCX-700 HEAVY COURIER

\* See below for more information.

Craft: Corellian Engineering Corporation VCX-700

Type: Heavy Courier

Scale: Starfighter

Dimensions:

-Length: 26m

Skill: Space Transports

Crew: 1-5

-Gunners: 4

-Skeleton: 1/+0

Crew Skill: As per players' skills

Passengers: 6

Cargo Capacity: 5 metric tons

Consumables: 1 month

Cost: 350,000 (new); 250,000 (used)

Hyperdrive: x1 (Backup: x12)

Nav Computer: Yes

Maneuverability: 2D+2

Speed:

-Space: 7

-Atmosphere: 350; 1,000kmh

Hull: 5D

Defenses:

-Shields: 3D

Sensors:

-Passive: 20/0D

-Scan: 40/1D

-Search: 80/2D

-Focus: 3/3D

## WEAPONS:

### 2 Heavy Laser Cannons (Fire-Linked)

Location: Front Right Hull

Fire Arc: Turret

Crew: 1

Skill: Starship Gunnery

Scale: Starfighter

Fire Control: 2D

Range:

-Space: 1-3/12/25

-Atmosphere: 100-300/1.2/2.5km

Damage: 5D

Rate Of Fire: 1

### 4 Light Ion Cannons (Fire-Linked)

Location: Rear Side Wings

Fire Arc: Front

Crew: 1

Skill: Starship Gunnery

Scale: Starfighter

Fire Control: 1D

Range:

-Space: 1/3/7

-Atmosphere: 100-300/700/3.6km

Damage: 5D

Rate Of Fire: 1

### Autoblaster

Location: Front Left Hull

Fire Arc: Front

Crew: 1

Skill: Starship Gunnery

Scale: Starfighter

Fire Control:

Range:

-Space: 1-5/10/17

-Atmosphere: 100-500/1/1.7km

Damage: 3D

Rate Of Fire: 1

### 4 Concussion Missile Launchers (Fire-Linked)

Location: Front Hull Corners

Fire Arc: Front

Crew: 1

Skill: Starship Gunnery/Missile Weapons

Scale: Starfighter

Fire Control: 1D

Range:

-Space: 1/3/7

-Atmosphere: 30-100/300/700km

Speed: 7\*

Damage: 10D

Ammo: 2 missiles each (8 total)

Rate Of Fire: 1

## DESCRIPTION:

The VCX-700 heavy courier is an unusual design for a mass-produced ship. It is specifically designed to provide an extremely secure transport for a small party or valuable cargo. To this end, it comes with more weapons than any other stock Corellian ship its size. It is heavily armored, with an outer hull as thick as a ship twice its size. Its powerful engines give it good speed and maneuverability, and its hyperdrive is almost military grade. It even manages to squeeze in a single escape pod. Of course all this comes at a price, and for the VCX-700 the cost is space. Although it can carry six passengers, it does so in cramped bunks built against a bulkhead. And despite its heavy armaments the VCX-700 is not a vessel for war, lacking the heavy shields or reinforced hull of a true gunboat. Against most fighters or pirate ships however, the heavy courier is more than able to outfight anything it can't outrun.

## GAME DESIGN NOTES:

### Source

This ship was originally presented in the article "A Legacy of Starships" in Star Wars Gamer magazine issue #2, by Owen K.C. Stephens, illustrated by Jeff Carlisle, and appeared early in Star Wars D20. This is an attempt to convert it to Star Wars D6 using the D6 to D20 conversion rules presented in the back of the first Star Wars D20 rulebook. I also use these sources to help with anything that does not convert directly: Galaxy Guide 6 Tramp Freighters; Pirates & Privateers; and the Starship Pricing guide (starship construction rules from the D20 Starships of the Galaxy converted back to D6); Other D6 ships and sources here and there for comparison, such as for sensors, weapons, speed, hull/shields, etc.

Weapon Damage dice will be converted with the D6 to D20 conversion rules, but other traits such as range and Fire Control may be taken directly from Starship Pricing for simplicity, unless they need a more involved touch, then other sources may be listed in their write-up and stat block.

### Maneuverability

If there is no bonus listed in the D20 rules, Maneuverability will be listed as 1D (military ships will be listed as 2D). If a bonus is listed, I am torn between making every +1 = 1D, or having every +2 = 1D. To be safe, I will use the lower option, but GMs/players have the option to either increase this when using the ship, or modify it to be better after acquiring the ship.

## Speed

Star Wars D20's early books had something like Movement Speed categories (Cautious/Docking = 1/2 Speed; Cruising Speed = Normal Speed; High/Attack = x2 Speed; All-Out/Ramming = x4 Speed), but they never had a Speed number to go with the ship stat blocks, so all ships seemed to have the same speed. A simple conversion is: Cautious = Space 2; Cruising = Space 4; High Speed = Space 6; and All-Out = Space 8 or higher.

## Missile Speed

If you are using traditional Star Wars D6 rules, just ignore this, it's no big deal. However, if you want your missile weapons to work more like other sci-fi franchises, and/or a little IRL, then use this optional rule: When fired, the missile does not stop at space range 7. Instead, it keeps traveling, using this range as the missile's Space Speed (and relevant Atmosphere Speed). The missile keeps traveling in that direction at this speed (if it did not hit anything last round, like if the chaser was just out of range). While this means missiles can be more useful, it also means moving targets like ships will have more time to figure out what to do against the incoming missile(s).
