Characters D6 / Verdant T/S Generic Pilot

Verdant T/S Generic Pilot

Verdant Technologies/Spaceworks was subject to raids fagaisnt supply convoys, manufactoring plants ecetera. This was
especialy true from the time just before the Battle of Endor up to the Rebirth of the emperor. Around the time of the
Vattle of Hoth they hired pilots and kept some of their fighters around. They then began keeping capital ships to alunch
them from. A Verdant T/S Security Fleet began to form. So in the itnerest of keeping things in control, Verdant created
the VSF, Verdant Security Force. This was basicly a private army and navy for the corporation. It became icnreasingly well
funded. The original pilots they hired before the VSF existed though were not terribly skilled or specialised.
