

Jubei

Jubei is a grizzled Napanese swordfighting champion, he has next to no martial arts skills and relies purely on his swords.

He uses both his tassled katanas at once in a fight and often overwhelms his opponet with a ferocious onslaught of attacks,

only to pull something tricky and end up simply stabbing them in a totaly undefended region. He lost his eye in one duel

and ahs scars from many others. He is most famous for a fight with a dark jedi, where he lost his eye.

Jubei's swords are

mandalorian iron and so he was able to parry the Jedi's blows. He was taken across the eye with the lgihtsaber though,

however Jubei kept fighting. He used his unique firestorm attack, slashing rapidly at the jedi putting him back on

defensive. In his usual style, Jubei was tricky, and cut off abruptly drawing back. This drew an attack from the Jedi at

Jubei's head. It was the eaxct attack Jubei wanted him to make. He brought his blades around with a flicik of the wrist,

chaning their direction. One blade caught the saber a couple inches from the side of his chead, and an instant later the

second katan flashed out sideways from it. It went by so fast that people sa the sword meet the lightsaber, and then the

second sword flick out, and the sword ended facing directly to the side, as the Jedi's head was just begginig to fall to

the ground.

Sword Moves:

Blades of Fire

Difficulty: Difficult

Effect: The blade is mvoed with such speed that three rapid strokes take the place of one but it is only barely perceivable as a blur. and the end of the sword emits a slight glow actualy making it look almost as if it turned into fire, hence it's name. Jubei claims this is a family secret move. If the attack is successful, then damage and max damamge for that strike are increased by +1D.

Firestorm

Difficulty: Very Difficult + Opponent's Parry

Effect: The user must first make the very difficult melee combat roll. This is a rapid onslaught of Blades of Fire attacks with both swords, claimed to be Jubei's own personal addition to his family's secret style. If the attack and primary rolls are successful then the user get 6 strikes, 3 with each sword, with only -1D multiaction for the entire use of the move. This move is a full action.

Ex. Jubei uses Firestorm, he passes his Primary roll with the difficulty of Very Difficult. Then, he rolls 6 attacks, with only -1D multiaction, so each attack is rolled at 8D+1. He hits with four strikes, the damage and maximum damage of the strikes are increased by +1D. Thus his sword strikes do 7D+2 damage.

Note: If a force point is used, the user may choose to do one of three things:

- 1) Use the Force Point normally
- 2) Have the move not be a full action
- 3) Have each strike be a Double slash as well as a Blade of Fire Attack.

Name: Feint/Attack

Description: One opponent "fakes" an attack to throw off the other's balance. He returns his sword to "home" position.

Difficulty: A Moderate Melee Combat roll is needed. Modified by opponent's Perception/Sense roll.

Effect: This maneuver is considered a multiple action, because the attacker will make two strikes: The fake one, and the

real one. If the attempt was successful (The melee roll was higher than the opponent's roll), the attacker gets to add

that difference to his strike, because the defender was knocked off balance, and unable to properly defend himself (-2D:

1D is because of multiple actions: Defending Twice). However, if it is the reverse (the defender's roll was higher) the

defender saw the feint, knew not to defend it, and will be able to see the real strike, and defend it with no modifiers.

Name: Double Slash

Description: A double slash starting at the upper right or left of the torso, and striking diagonally downward, then

turning back towards the side, and again, cutting downward diagonally. There is no action penalty for this attack.

Difficulty: The difficulty is Very Difficult. Should the total be missed by more than 5, the attack missed completely,

and the attacker is off balance for 1D rounds. If the total is missed by 10 or more, then the attacker inflicts damage

upon himself.

Effect: Should the attack be successful, two damage rolls are made instead of one.

EX: Jubei rolls a 36 on his attack against an opponent. The opponent rolls a 32 parry. Jubei then rolls two damage rolls instead of one.
