Description: Mox was a young clone cadet who became a prisoner of the Galactic Empire shortly after the end of the Clone Wars. Along with several other cadets, Mox was transferred away from his home planet Kamino and brought to an Imperial laboratory operated by Doctor Royce Hemlock on Setron. There, samples of the clones' blood were taken for experimentation.

After the Empire lost control of an experimental weapon at the facility, they abandoned it and called an orbital bombardment to eliminate all evidence of their operations there. Mox escaped with fellow clones Deke and Stak before the destruction took place.

Biography

Mox was a clone of the bounty hunter Jango Fett, created for the Grand Army of the Republic by the Kaminoans. He was a clone cadet until the rise of the Galactic Empire, at which point he and various other young clones were transferred to one of Hemlock's labs on the planet Setron. Here, the clones had samples of their blood taken to be studied. However, the Empire soon lost control of an experimental weapon, so they relocated and destroyed the facility. Mox and two other cadets, Stak and Deke, survived but were left abandoned.

Later, Hunter and Wrecker of Clone Force 99 arrived on Setron hoping to find Omega, who had been captured by the Empire. Deke assisted them in their mission to gather data from the deserted lab. Mox refused to help, saying it was too dangerous. While Deke and the newcomers were gone, Stak appealed to Mox and said that they should take Hunter and Wrecker's ship and escape the planet. Although Mox initially declined, citing his admiration for Hunter and Wrecker's loyalty to their squad as well as not wanting to leave Deke behind, he eventually considered it when Stak said that if the vines destroyed the ship, they would all be stranded. He had Stak lead him to the ship and watched as Stak was able to hotwire it and get inside. However, before they could decide to take the ship and leave, Deke called for their help over comms. Mox and Stak decided to go and rescue them, flying the Marauder over the lab and rescuing them from giant slither vines.

Finally free from their solitude on Setron, the three young clones were taken to Pabu for refuge.
