Characters D6 / Olly (Refuelling Depot Droid)

Name: Olly
Class: Service droid
Voice: Male
Sensor color: Yellow
Plating color: Gray (rusted)

DEXTERITY 1D
Dodge: 2D
KNOWLEDGE 1D
Streetwise 2D
PERCEPTION 2D
Bargain 4D, Search 3D, Persuasion 3D
STRENGTH 1D
MECHANICAL 1D
Space Transports: 2D
TECHNICAL 2D
Space Transport Repair: 3D

Equipped With:
Humanoid Body, Arms and Legs
Visual and Audio Sensors (Human Range)
Vocabulator

Move: 9
Force Sensitive: N
Force Points: 1
Dark Side Points: 0
Character Points: 2

Description: Olly was a service droid that worked as an attendant at a refueling depot inside a lunar base. The pirate Phee Genoa used the depot and visited around 18 BBY to refuel her starship, the Providence. Asking Olly for the usual, she and the power droid MEL left him to refuel the vessel, which he did without noticing the Imperial operative CX-2 sneak aboard to steal flight data. Once the refueling was finished, Genoa paid Olly 1,600 credits and change before leaving.

Biography
Olly was a service droid that worked as an attendant at a refueling depot inside a lunar base on an airless moon. The pirate Phee Genoa visited the depot to refuel her starship, the Providence, on several occasions and landed there again around 18 BBY. Olly emerged from a mechanical room labeled "depot manager" as Genoa disembarked with her power droid, MEL. The pirate asked Olly for her usual before she and MEL entered the mechanical room.

As Olly grabbed the fuel line from atop a nearby crate and carried it over to the Providence's fuel port, the Imperial operative CX-2 snuck out from behind nearby barrels and boarded Genoa's

vessel without Olly noticing. The Imperial entered a data spike into the ship's terminal to extract the flight records, setting off an alarm just as Olly attached the fuel line. Hearing the alarm, the droid quickly detached the line and paused, looking toward the machine room where Genoa and MEL were unaware of the alarm. However, CX-2 quickly stopped the alarm, and so Olly reattached the fuel line while shaking his head.

The droid then pressed the button to begin the refueling, removing the line once it was complete. Genoa and MEL left the mechanical room, and after MEL was loaded back onto the Providence, Genoa became suspicious that someone else might be onboard; however, before she could investigate, Olly approached to ask for payment of 1,600 credits for the fuel. The pirate turned and handed him a credit chip and told the droid to keep the change, providing time for CX-2 to slip away with the flight records unnoticed. Genoa then boarded her starship and left the base.

Characteristics
Olly had yellow sensors and gray plating that had rusted brown in places.
