Admiral Harlo Dev

Admiral Harlo Dev served a long and rather unglorified career, first in the Imperial Navy as a Line Captain on board the Star Destroyer Nefarious before defecting to the Rebel Alliance upon the destruction of the peaceful world of Alderaan.

Even with their amazing victory at the Battle of Endor, the Rebel Alliance was still as vulnerable as they had always been. Upon the death of Admiral Ackbar and the destruction of his flagship, the Home One, the Alliance High Command suprisingly called upon Dev to replace him above other more likely candidates such as Admiral Drayson.

Unfortunately, Admiral Dev was assassinated only five months after taking command during a daring and cunning Imperial Intelligence operations team which was able to infiltrate the vessel and deliver a single fatal blaster shot to Dev in the back of the head.
