Altitude Range: Ground level-1m
Maneuverability: 1D
Move: 30; 90kmh
Body Strength: 2D
Weapons:

Description: Wim's hoverbike was an inexpensive hoverbike owned by the human Wim on the planet At Attin during the New Republic Era.

Characteristics
The teal and yellow hoverbike was an inexpensive recreation speeder owned by the human Wim on the planet At Attin during the New Republic Era. It was 1.39 meters long, 0.64 meters wide, 0.78 meters high and had a storage basket mounted on the rear of the bike.

History
Around 9 ABY, after oversleeping and missing the tram for the Career Assessment Test, Wim ran back home got his bike from the garage. Trying to make it to school in time for the test he speed past the Ithorian Mrs. Ikk scaring their frog-dog causing it to bark at him. Wim took his hoverbike through the forest hoping it would be a shortcut. While racing through the forest on his hoverbike, Wim runs into several branches and shrubs, causing him to drop his helmet. As he rides towards the city center he attempts to slam the breaks to avoid a ravine but loses his balance and falls down into the ravine. In the ravine Wim finds a hatch which he believes might be a Jedi Temple however before he can investigate a Safety droid finds him and escorts him to school. Later Wim returns to the raving with his friend Neel and their hoverbikes.
