Range {rifle}: 3-30/100/300
Range: 10-60/400/800
Damage {compact}: 4D
Damage {rifle}: 5D
Damage: {sniper} 5D

Description: The A300 blaster rifle, also known as the A-300 blaster rifle, was a blaster rifle manufactured by BlasTech Industries, similar in appearance to the A280 blaster rifle and almost identical to the A280-CFE. It was notably used by many Rebel Alliance Special Forces members of Rogue One during the Battle of Scarif.

Features
The A-300 contained a power cell housing and an adjustable electroscope. The weapon had several variant configurations. The compact version of the A-300 had a collapsed barrel and removed shoulder stock. The rifle configuration contained an extended barrel and shoulder stock. It could also be configured into a sniper rifle by replacing the barrel with an air-cooling barrel shroud, which looked very similar to the A310 rifle.
