Starships D6 / Corellian Engineering Corpora

Name: Corellian Engineering Corporation JT-731 Broadhorn transport
Manufacturer: Corellian Engineering Corporation
Model: JT-731 Broadhorn
Type: Freighter
Scale: Starfighter
Skill: Space Transports - JT-731 Broadhorn transport
Crew: 1
Crew Skill: Space Transports 5D, Starship Gunnery 4D+2, Starship Shields 3D
Passengers: 10
Consumables: 2 Months
Cargo Capacity: 120 Tonnes
Hyperdrive Multiplier: X2
Hyperdrive Backup: N/A
Nav Computer: Yes
Space: 5
Atmosphere: 250;750kmh
Maneuverability: 1D
Hull: 4D
Shields: 2D
Sensors:
- Passive: 30/0D
- Scan: 50/1D
- Search: 75/2D
- Focus: 2/4D+1

Weapons:

Description: The JT-731 Broadhorn transport, simply known as the Jabiim freight transport, was a model of utilitarian freight transport manufactured by Corellian Engineering Corporation used during the Imperial Era. Two of these transports were used by the Hidden Path, a resistance underground network that smuggled Jedi and other Force-sensitives away from the Galactic Empire, due to the fact that refuse and maintenance craft were often overlooked by Imperial patrols. The ship had data and power conduits located on the outer hull to maximize internal cargo space. In 2 BBY, one of these ships was used to transport Rebel soldiers to Base One on Yavin IV to be initiated into Massassi Group.
