Weapons D6 / Inkbomb

Name: Inkbomb
Type: Ink Grenade
Availability: 1,F
Cost: 125
Radius: 7 meters
Damage: N/A *

*: The aquatic version of a Smoke Grenade, creates a cloud of Ink covering a 7 meter radius, which adds +15 to target numbers to hit targets inside the Ink or through the Ink. Only works in water.

Description: Inkbombs were explosives that released a cloud of ink. They were used in aquatic environments in order to blind and confuse enemies. During the Second Imperial Civil War, Imperial Knight Treis Sinde used inkbombs to attack a squad of seatroopers. With a cloud of ink obscuring the seatroopers' vision, they were forced to switch to infra-red sensors, allowing Sinde to ambush them as they made the switch.
