

Name: Sienar Fleet Systems Interdictor-class Star Destroyer

Scale: Capital

Length: 1,600 meters

Skill: Capital ship piloting: Interdictor-class Star Destroyer

Crew: 37,085, skeleton: 1450/+10

Crew Skill: Astrogation 5D, capital ship gunnery 5D, capital ship piloting 5D, capital ship shields 4D

Passengers: 5000 (troops)

Cargo Capacity: 15,000 metric tons

Consumables: 1 year

Cost: 175,000,000 credits

Hyperdrive Multiplier: x2

Hyperdrive Backup: 8

Nav Computer: Yes

Maneuverability: 1D

Space: 6

Atmosphere: 320;975kmh

Hull: 6D+2

Shields: 3D

Sensors:

Passive: 50/1D

Scan: 100/3D

Search: 200/4D

Focus: 6/4D+2

Weapons:

Heavy turbolaser Cannon Batteries (30)

Scale: Capital

Fire Arc: 5 Front, 10 Front/Left, 10 Front/Right, 5 Back

Skill: Capital Ship Gunnery

Fire Control: 4D

Space Range: 3-15/36/75

Atmospheric Range: 6-30/72/150 Km

Damage: 7D

Heavy ion cannons (30)

Scale: Capital

Fire Arc: 10 Front, 5 Front/Left, 5 Front/Right, 10 Back

Skill: Starship Gunnery

Fire Control: 3D

Space Range: 1-8/16/36

Atmospheric Range: 2-16/32/72 km

Damage: 4D

Tractor Beam Projectors (2)

Scale: Capital

Fire Arc: 1 Front, 1 Back

Skill: Capital Ship Gunnery

Fire Control: 3D

Space Range: 1-5/15/30

Atmospheric Range: 2-10/30/60 km

Damage: 4D

Gravity well projectors (4)

Fire Arc: Turret

Crew: 1

Skill: Capital ship gunnery

Fire Control: 6D

Space Range: 1-5/75/150

Damage: Blocks hyperspace travel

Starfighter Complement:

Starfighters (16)

Description: The Interdictor-class Star Destroyer was a variant of the Imperial I-class Star Destroyer equipped with gravity well projectors.

Characteristics

Sienar Fleet Systems already produced an Interdictor, the Immobilizer 418 cruiser based on a 600-meter Vindicator-class heavy cruiser (also used for the Enforcer-class picket cruiser). Though it was decently armed for its size, it was a high-priority vessel that was generally unable to hold its own in combat, especially if the battle involved Imperial Star Destroyers and comparable vessels.

To make room for the gravity well projectors, half of the turbolasers and ion cannons, as well as eight of the Phylon Q7 tractor beam projectors found on the original Imperial-class Star Destroyer, had to be removed. The Interdictor-class Star Destroyer's reduced hangar held sixteen TIE fighters.

The Interdictor-class Star Destroyer did not require additional support when performing patrol and customs duties. Some bold commanders such as Loka Hask even used the ship to pull armed convoys out of hyperspace and destroy them.

Nonetheless, like the Immobilizer, the gravity wells remained a major drain on the ship's main reactor, with the vessel only being able to sustain its Gravity wells for a single day. This had the potential to compromise defenses in heavy combat. For instance, while Loka Hask's Dominator had interdicted and was destroying a New Republic Convoy, Rogue Squadron's X-wings counterattacked by hitting Dominator with a salvo of proton torpedoes. While an Imperial Star Destroyer's shields would have easily held up against such an assault, Dominator's shields partially collapsed, and the hull took some damage, prompting its commanders to call off the battle. Rogue Squadron also successfully used this tactic on the

Immobilizer 418 cruiser Aggregator, which caused it to retreat.

History

Since its conception, the Interdictor-class played a significant role in the Galactic Empire. Commanders frequently used these ships against pirate insurrections and small pockets of resistance. Because this ship's capabilities prevented other ships from escaping, these vessels were also extensively used in raids and invasions. However, despite their capabilities, they were relatively rare in the greater Imperial Navy, mostly due to them "building big." Leia Organa Solo, a high-ranking member of the Rebel Alliance, later noted that it was a hidden blessing for the Rebels that the Empire did not mass-produce the Interdictor-class and similar vessels.

A ship of this class was used as a command ship by Lord Darth Vader in the months immediately after the Battle of Yavin, but it was destroyed above Jazbina by Rebel pilot Jal Te Gniev.

An Interdictor Star Destroyer participated in the Battle of the Graveyard against Renegade Squadron. The Star Destroyer's gravity well projectors, which kept the Rebel fleet from fleeing, were destroyed. A few participated in the Attack on Bannistar Station.

In the months immediately after the Battle of Endor, ships of this class, such as Dominator and Binder, seemed to have been specifically deployed in Imperial efforts to defeat the Rebels' legendary Rogue Squadron.

By 9 ABY, Grand Admiral Thrawn's fleet at the Battle of Bilbringi included a number of Interdictor-class Star Destroyers.

Thrawn used these ships in many of his attacks in his campaign against the New Republic. Thrawn ingeniously used these craft on multiple occasions to pull his own ships out of hyperspace, making the jump more efficient, because the incoming vessels could scramble into a situation with almost unprecedented precision.
