Description: Cade Skywalker was a Human male bounty hunter, smuggler, and pirate, who in his youth was once the Jedi Padawan of Wolf Sazen. The son of Jedi Master Kol Skywalker and Morrigan Corde (also known as Nyna Calixte), Cade was also a direct descendant of Luke and Anakin Skywalker and a descendant of Ben Skywalker. Cade was also the nephew of Nat Skywalker (also known as "Bantha" Rawk) and his wife Droo Rawk, half-brother of Gunn Yage (though neither knew of the other's existence), cousin of Ahnah, and step cousin of Skeeto, and Micah Rawk.

Thousands of years before his birth, he appeared in a vision shared by Jedi Masters: Feln, Q'Anilia, and Xamar, along with his ancestors, Luke Skywalker, and Anakin Skywalker, who became Darth Vader, as well as Zayne Carrick, all of whom would be affected by the Muur Talisman. After his mother left him as a baby, Cade was raised as a Jedi by his father on Ossus where he would be apprenticed to his father's former apprentice, Wolf Sazen. He spent most of his childhood where he became close to Padawan Azlyn Rae. However, at the start of the Second Imperial Civil War, Cade turned his back on his heritage after being traumatized by watching his father's death at the hands

of Darth Nihl and the One Sith. After successfully reviving his master, he swore his revenge and eventually became a pirate and bounty hunter, operating from his personal starship, the Mynock with his longtime companions Jariah Syn and Deliah Blue.

After his existence and unique Force powers were discovered by Sith Lord Darth Krayt, Cade was unwillingly pulled into galactic affairs. Caught up in the power struggle between the Sith and the exiled Emperor Fel, Cade became willing to do whatever it took to ensure he was left alone, but was eventually captured by the Sith. Following his capture, Krayt acknowledged that Cade had more power than he had ever seen in any Jedi, and offered him to join him and the Sith. Refusing his offer, Cade was forced to watch his friends die when Darth Maladi planted Yuuzhan Vong Yorik-Kul coral seeds. Cade had no option but to help both of his friends by using his anger to cure them at a great cost. With the dark side corrupting him, Cade was surprised that Krayt showed him his father's lightsaber and revealed his former identity as Jedi Master A'Sharad Hett. Skywalker was able to escape when he injured Nihl and Talon.

After being briefly captured by the Sith, Cade was reunited with his uncle and his childhood sweetheart, Azlyn Rae, who secretly became an Imperial Knight. After arriving to the secret Hidden Temple on Taivas, and been followed by several Imperial Knights, Cade was angered by Azlyn's betrayal until he had met with the new Jedi Council members, K'Kruhk, Tili Qua and T'ra Saa. Together, they participated in a successful mission that saw the presumed death of Darth Krayt. However, Krayt's traitorous advisor conspired to keep this fact a secret and appointed himself Regent over Krayt's Empire. After saving Azlyn's life, against her wishes, Cade and Azlyn's relationship fell apart. Angered by the destruction his actions continually caused, Cade left for Tatooine, where he began raiding Black Sun shipments. These events drew the attention of both his mother and his half-sister Gunn Yage.

After leaving Tatooine, Cade and his crew accepted a recovery mission on Wayland, site of the failed Ossus Project. There, Cade encountered Darth Maladi, who was seeking to perfect a new Sith bioweapon. Cade attempted to heal Blue, who had been captured and implanted with the weapon, but to no avail. Wolf Sazen tracked Cade to Wayland and convinced him to use the light-side of the Force to heal Blue, which was successful. As a result of these events, Cade finally rejected the dark-side but resolved to not rejoin the Jedi Order, believing the Force shaped him for a different destiny, to destroy the One Sith.

Cade set off on a quest for vengeance, accompanied by his friends. On Utapau, Skywalker killed Sith scientist Vul Isen and learned of Krayt's return from the dead. He would encounter his mother once more on the Wheel, where under the council of his father, forgave her and healed her from certain death. Shortly thereafter, Skywalker returned to the Jedi Hidden Temple on Taivas to defend against the incoming attack there. The battle was a disaster for the Jedi and its allied forces, and Nat Skywalker sacrificed his life to save that of his nephew. Distraught by his uncle's death, Cade led an elite strike team to shut down Coruscant's planetary defenses in the final battle of the war. Cade lost his former master in the fight, but succeeded in resisting temptation and as a Jedi, killed Krayt once and for all. To ensure the Dark Lord of the Sith would never return, Cade took his mother's ship to the planet's sun, where he intended to incinerate both himself and Krayt's body. However, under the guidance of Luke Skywalker, Cade escaped the doomed ship, and was rescued by Syn, R2-D2, and his lover, Deliah Blue. With the war over, Cade Skywalker set out for a distant place where the group could be in peace.

Personality and traits

Cade was known for his independent nature and his utter adverseness to having others sacrifice themselves for him. Like his ancestor Anakin Skywalker before him, Cade was reckless,

headstrong, and often led by his emotions. He walked a fragile line between the light and dark sides of the Force, frequently unnerving his friends and Jedi companions with displays of his dark side abilities, while also frustrating his former master, Darth Krayt, with his resilience against the lure of the dark side's power. This resilience, however, impressed Celeste Morne, who said she had never met someone who walked so close to the dark side and yet was so resistant to its lure.

Furthermore, Cade exhibited a lack of respect for others (especially toward those in positions of power) to the point where he would openly mock them in public.

Cade was also, again like Anakin Skywalker, unwilling to let those he cared about go. His constant use of his healing powers to keep people from dying, like Azlyn Rae and Deliah Blue, was proof of this.

Once Cade began to re-embrace the light side he decided to bring war to the Sith. Later after experiencing a vision of him and Darth Krayt in one final duel he realized that it was his destiny to stop Krayt. Cade's return to the light also brought about a more compassionate change in him. This was demonstrated by his forgiveness of his mother and the mourning for his uncle's demise on Taivas.

But perhaps his most incredible achievement that marked his return to the light side was that he withstood the corrupting powers Krayt used to try to force him down the dark side and stayed true to his Jedi heritage.

Powers and abilities

Force Powers

As a member of the Skywalker family, Cade had a naturally strong connection to the Force, and was immensely powerful in its use.

As a Padawan, Cade showed incredible potential in the ways of the Force, being able to hold his own against a large number of stormtroopers and Sith during the Massacre at Ossus even though he was a simple child still in training. Cade was skilled in the use of the hibernation trance, which he used on at least two occasions, once after the Massacre of Ossus and again after the Battle of Coruscant.

His powers did not appear to atrophy in the seven years he spent in Rav's crew, despite rarely drawing on his powers in that time and his use of deathsticks. During a confrontation with Darth Talon on Vendaxa, Cade used the Force to hurl a crashed starship at the Sith, once more tapping into his anger to fuel his abilities. He later admitted that he could sense the Sith nearby, showing that his Jedi senses were as attuned as ever. When he attempted to rescue Hosk from the Temple of the Sith on Coruscant, he was able to sense the Jedi's presence from outside the mammoth structure.

He was proficient with telekinesis, capable of using a very powerful Force push, on many occasions, like in the Sith temple on Coruscant against Darth Talon, where he threw the Sith Lady back with a powerful kinetic blast, injuring her .

He could also use Force choke, a dark side power associated with the Sith, which he used against Gunn Yage After his training with the Sith, Cade became proficient in the use of Force lightning beyond his untrained talents. The voltage of his lightning was strong enough to injure a Hand-class Sith like Darth Nihl and defeat an elite Sith Trooper.

When Cade went to reclaim the Grinning Liar, Rav ordered all of his henchmen to attack Cade, and while greatly outnumbered, Cade singlehandedly defeated all of them.

When Darth Maladi set her base on Wayland to self-destruct, Cade was able to project a protection bubble over himself and Deliah Blue to protect them from the explosion and its residual effects. Cade once used a Force scream that impressed Darth Krayt.

The power to cheat death

Perhaps his most impressive and mysterious power was his apparently instinctive ability to create and use Dark transfer, which allowed him to revive Wolf Sazen from death. To do so, Cade tapped into the power of the dark side, and both he and Sazen felt the effect as Force lightning coursed over their bodies. The power he exerted even caused Cade's eyes to glow with Force energy. Within moments, Sazen had been revived, and he was soon able to talk and walk of his own accord. As Cade would later relate to Sazen some seven years later, the price for bringing his Master back from death was high: Cade admitted he "tapped into all the fear and rage" within him, and, as he told the Force ghost of Luke Skywalker, he was afraid that the hunger for power he felt that day was "not a good place for a Skywalker to be". Cade could also use this to purge other ailments from other beings bodies.

Cade's use of the dark side was even felt by Darth Krayt, from the New Imperial Palace on Coruscant. Krayt believed that this power would enable him to cheat death, and began a search for what he called "a dark light in the Force". Cade's ability to tap into the Force was so powerful that he was able to manifest and control Force lightning to such a degree that he was able to prevent his ship from being torn apart by a large lightning storm ravaging the entire planet. Cade later learned to use Dark transfer in coordination with the light side of the Force, which was apparently what was needed to overcome previous obstacles to its healing powers.

In addition to being able to heal people with his power, it could be used to hurt others that suffered a previous injury in moments, by allowing Cade to focus it into a point where their wound was, by finding shatterpoints. Either healing or injuring someone with his Force ability, he could completely manipulate someone's body.

Ultimately, Cade managed to find the ability that his ancestor, Anakin Skywalker, had desired for so long—to keep people from dying, especially those whom the user loved.

Lightsaber skills

Like his ancestors before him, Cade was very skilled in the art of lightsaber combat, defeating numerous Sith and Stormtroopers to escape the Massacre at Ossus. Abandoning the Order, Cade swore never to pick up a lightsaber again. When Princess Fel was wounded attempting to save Cade several years later, he took up her lightsaber and without practice, attacked and stove off Darth Nihl, one of Darth Krayt's Hands.

After participating in further Jedi training, Cade went to Coruscant to rescue Hosk Trey'lis and dueled Krayt's other Hand, Darth Talon. He managed to disarm her, only to be subdued by Nihl. Cade was then trained in the ways of the Sith before attempting an escape, defeating both Darths Talon and Nihl. He then dueled Darth Krayt, holding the Dark Lord off until his mother could provide a method of escape. Cade would continue to display his skills with a lightsaber on Had Abbadon, where he once again defeated Darth Talon and Krayt's new hand, Darth Stryfe. Cade along with Wolf Sazen fought and killed several Sith on the planet Daluuj, including a Sith Lord who claimed to have already killed powerful Jedi. Cade also dueled Vul Isen, the butcher of Dac, and killed him.

After Darth Krayt's return Cade openly fought against Sith, slaying stormtroopers as well as an attacking Sith during the Bombing of Falleen. Cade easily defeated many attacking Sith when they attacked the Hidden Temple and later, when Darth Krayt's Sith troopers were unleashed, Cade managed to kill several of them despite their advanced abilities. After a fierce duel, Cade fully embraced the light side and struck down the Darth Krayt during the Battle of Coruscant.

Cade was able equal in his lightsaber abilities with the leader of the Imperial Knight, Antares Draco. When Cade was on Tatooine he fought the Anzat bounty hunter Sint Yoru, in which the Anzat brandished a lightsaber he claimed to have obtain from a Jedi he hunted and killed. Cade declared that the only difference between them was skill, and killed the Anzati with one strike.

When engaged in lightsaber combat, Cade frequently utilized leaping and acrobatic maneuvers in his bladework. Cade also used Force powers in conjunction with his lightsaber, making him twice as deadly in battle.

Other skills
In addition to his Force powers, Cade was a capable starfighter pilot, being able to ditch Skull Squadron, some of Darth Krayt's best pilots, when he was attempting to rescue Trey'lis. He was also proficient in both hand-to-hand combat and ranged combat with his weapon of choice, the Rawk chopped special.

Equipment
As a Jedi Padawan, he used a blue lightsaber. During his self-exile, Cade used Marasiah Fel's lightsaber after she saved him from a Sith. After he left Deliah Blue and Jariah Syn on Vendaxa, he went to Ossus, where he was armed with a green lightsaber when he battled a vision of Darth Vader. After he met Nei Rin, Rin gave him his father's lightsaber, which he brought with him to Coruscant. After his capture, it was seized by Darth Krayt. It was later recovered by Cade after his father's Force ghost appeared to him. He used the Force to shatter the transparisteel his father's lightsaber was encased in, and used it to fight the Sith.

In his pirate years, Cade also had a collection of antique and modified blasters, his favorite being the Rawk chopped special, a custom double-barreled blaster carbine built for him by a chief mechanic of the Selonian Shipyards, and his own uncle, Nat Skywalker, then going by the alias "Bantha" Rawk. Because of a recognition code programmed in it, the blaster only worked for Cade and no one else. He also wore trousers that resemble those worn by Darth Vader.

Romances
Deliah Blue
Deliah was Cade's companion and primary love interest. Cade's interest in Deliah was usually playful and sexual. Deliah would help him through his troubled times such as his death sticks usage or loss of people he cared about. Cade's relationship with Deliah would later grow into love; he would go as far to risk himself to save her from Maladi's weapon and he would finally admit his love for her.

Azlyn Rae
Before Deliah, Cade and Azlyn were close during their Jedi training on Ossus. They developed feelings for one another and kissed on at least one occasion. They met again years later and slowly rekindled their relationship. When Rae was badly injured by Celeste Morne, Cade tried to keep her alive. Though he managed to have a cyborg suit made for her, she was angry at Cade for not letting her die. Their relationship ended after that.

Darth Talon

Cade and Talon were enemies at the beginning and briefly became allies during his time among the Sith. Cade would pretend to be a Sith and Talon would be his master. They had a bond when Cade healed her and the two became close. They shared some moments of passion, though she had sensed Cade's deception. Cade turned on the Sith and Talon eventually become his enemy again.
