

## Droids D6 / Arakyd Droid Interceptor

### Arakyd Droid Interceptor

Arakyd's droid interceptor was originally designed solely for use in the Republic's AFC combat vehicles. However, with their effectiveness when deployed on the battle field, Arakyd quickly decided to begin marketing them by themselves.

The droid itself is compact and streamlined for increased speed as well as maneuverability. Its main drive is not the repulsorlift generators but a pair of small and powerful ion engines designed specifically for it, boosting the droid up to six hundred kilometers per hour.

The droid is armed with a pair of fire-linked blaster cannons primarily intended for use against troops and light combat vehicles such as airspeeders and speeder bikes. Arakyd also incorporated a small deflector shield generator, a concept popular among the war droids used by the Trade Federation.

Model: Arakyd Mark I Automated Combat Interceptor

Type: Atmospheric automated attack fighter

Scale: Speeder

Length: 5.2 meters

Crew: None (fully automated droid brain)

Crew Skill: Repulsorlift operation 4D, vehicle blasters 4D

Cost: Not available for sale

Maneuverability: 2D

Atmosphere: 210; 600 kmh

Hull: 2D

Shields: 1D

Weapons:

2 Blaster Cannons (fire-linked)

Fire Arc: Front

Skill: Vehicle blasters

Fire Control: 2D

Range: 10-30/150/500

Damage: 4D
