Droids D6 / FIDO Security Droid

FIDO Security Droid

The FIDO is a very impressive system. The main unit is in a centralized position while the tentacles reach out with buzz-saws or punchers and a blaster rifle on each tentacle. It can easily ward off attacking forces. It's pinchers are able to pick up speeder trucks and hurl them, and it's buzz-saws able to cut through walker hulls. It's blaster rifles can pick off individual targets. It is a favorite among secret instalations because troops aren't required to be stationed and thus won'tbe missed. The droid remains rather expensive at the moment, but the price will be lowered soon.
